Time same time display adjustment

The product video recording same time with time display function, can adjust the time according to their own.

Amendments as follows:
First create a new Txt file by root of the storage TF card and change the file name in “Set Time”. Open “Set Time” file, inside edit year, month, day, hour, minutes and seconds format (for example, 2009.05.13 15:10:00), and save the file before exit.time created and modifications completed, when next time you start the machine, the time will be recorded simultaneously.
